Through osmosis, plant cells swell with water, divide and renew themselves

Through osmosis, plant cells swell with water, divide and renew themselves. The resulting pressure reaches up to 15 bar - many times that of a car tire (2-3 bar). Water Wisdom 2025 The first post in the new ...

Through osmosis, plant cells swell with water, divide and renew themselves. The resulting pressure reaches up to 15 bar - many times that of a car tire (2-3 bar).

Water Wisdom 2025

We begin the first post of the new year not with studies, statistics or expert statements, but with some thoughts and wisdom inspired by the properties of water.

It's good.
to be truu.
